web development

I am a web development enthusiast with a strong focus on full-stack technologies. Currently pursuing my MCA, I have developed several projects that showcase my skills in building responsive and user-friendly applications.
I am eager to contribute to a dynamic organization where I can apply my knowledge and continue to grow professionally

PROJECTS

Weather App
- Developed a responsive Weather App using React to display real-time weather updates.
- Integrated a third-party API to show temperature, humidity, wind speed, and forecasts.
- Included search functionality for city-based weather lookup with a clean, user-friendly interface.

Student Management System
- Created a full-featured system to manage student data, course enrollment, and academic records.
- Implemented secure authentication, student registration, class assignment, and performance tracking.
- Built a responsive admin dashboard for managing profiles, course info, and reports.
